Clarifying agent RT-PP03 is 3rd generation of Nucleating Agent, high performance sorbitol based and reduces haze and improve the clarity of polypropylene, and it can improve the heat temperature, and rigidity etc.

Chemical Characterization:

Chemical Name:1,3:2,4-BIS (3,4-DIMETHYLBENZYLIDENE)

SORBITOL

CAS Number: 135861-56-2

Molecular Formula: C₂₄H₃₀O₆

Appearance: White Powder (Odorless)

Melting Temperature:250-270°C

Purity:99% min

Usage: It is the third generation Clarifying Agent, belongs to the sorbitol based.

Widely used in Homo PP, Random copolymer PP.

Dosage:0.2-0.3%.

Packing:10kg/bag,500kg/pallet
